Students of Gypsy Jazz Begin with Cigano!

Cigano Gypsy Jazz guitars completely eliminate the obstacles of price and quality that often stand in the way of an aspiring musician to getting the right instrument...that is until now! Both the GJ-10 Petite Bouche-style and GJ-15 D hole-style guitars were created by the makers of Gitane guitars — one of the most respected producers of Gypsy Jazz guitars on the market today. As a result, all of the same traditional construction methods and attention to detail were used to assure that the tone, playability and workmanship of every Cigano will exceed the expectations of any player — even legendary players and modern pioneers of this musical genre.

“... not only are these little beauties a terrific value for the bloke who doesn't want to take out a bank loan just to have a bit of fun with old Django tunes, they're just brilliant well-made guitars with a massive sound. I take one with me wherever I go and recommend them to all my students. You can't go wrong when you're playing a Cigano!”

— Robin Nolan, Nov 2007

So, when your customers are looking to explore the sounds of swing, or are interested in owning an instrument with its own distinctive look and sound, don't just take it from us ... take it from those who know best ... Cigano is the answer!
