San Francisco, CA – March 2006 – **Gitane “Parisian” Gypsy Jazz Guitar Strings are a Big Hit!**

In the Gypsy Jazz world, finding the correct string to use with Manouche-style guitars has often been a challenge, not just for the beginning player wanting to find the secrets to getting the right tone, but even the professional who simply demands the best.

Traditionally used on Selmer/Maccaferri-style guitars, Parisian’s by Gitane are the best choice for Manouche players, gypsies and Django aficionados around the world. Available in two custom gauges made to be more durable and reliable without sacrificing the use of traditional materials and manufacturing techniques, each set is made using pure copper wrap which has been silver-plated, then wound on a steel core to make strings whose tension is correct, play well, and brings out the true tone of your Gypsy Jazz guitar. Made in USA.
