New Banjo Kit from Saga!

San Francisco, CA / May 19, 2004 – Introducing the re-introduction of the original Saga Banjo Kit! This was the first product SAGA ever offered, and the one that started it all.

The new Saga RK-2 banjo kit with resonator and flange (OK-2 without flange and resonator) features a new design cast aluminum rim with integral arch-top tone ring for a big, professional sound. The mahogany neck has a distinctive, original peghead shape that recalls the great, turn of the century banjos. All parts used in the kit are made to standard specifications and are of professional quality assuring that the instrument will be able to withstand weekly lessons or endless summers of festivals. All critical cutting and drilling has been done at the factory, allowing the builder the freedom to create a completely custom instrument without having the in-depth knowledge necessary to make a playable, high-quality musical instrument of this kind. Easy to follow instructions make the whole project simple and fun.

Saga's new banjo kit offers a professional sounding instrument at a very moderate cost and gives you the thrill of creating your own, custom banjo. All the difficult work is already done for you and the clearly illustrated, easy-to-follow instruction manual makes the task easy and fun!
