Valencia – The New Standard In Affordable Classical Guitars!

San Francisco, CA / April 23, 2004 – Saga Musical Instruments is proud to announce its new Valencia line of fine, Spanish-inspired, classical guitars. Never before has there been a guitar available on the market that offers such a wide variety of unprecedented quality and value at such a popular price point.

The line of Valencia guitars offers instruments with features that you will have a hard time finding anywhere else. For example, the VG-160, our lowest priced model, is an instrument of superb quality and playability and is available in full as well as fractional sizes down to ¼ size. At the same time, our top models use higher quality woods like solid spruce or cedar, fingerboards and bridges made from genuine rosewood, as well as a few other popular options such as cutaway shoulders and a high-tech German-made pickups by Shadow.

All guitars in the Valencia Line have a beautiful and durable, high-gloss finish that both protects the wood from the elements and enhances the overall look and tone of each instrument. As an added bonus only the best, gold plated, tuning machines were chosen to assure proper tuning every time.

So if you're looking for something different in the area of classical guitars, be sure take a closer look at Valencia by SAGA. The quality and value will speak for itself.
