Banjo

- Openback Banjo Kit
- Resonator Banjo Kit

Since the very beginning of our company, musical instrument kits have played an important role in helping us define our identity as innovators in the development of quality musical instruments. We have always believed that the instruments people choose have as much to do with their personal expression as the music they play. With Saga kits, you will never again lose a sale, as your customers can now purchase the exact guitar—or other instrument—of their dreams. When you sell a Saga kit, you'll provide them with all the necessities in one attractive box and your customer will then provide the imagination—and elbow grease!

Saga kits accommodate today's most popular music styles, and challenge any musician who is looking to be a little different than all the rest. Our electric guitar and bass kits come in eight of the most popular body shapes and pick-up configurations found on the market today, giving the owner a chance to make his or her own signature model. For those who are into more traditional music, Saga has brought back its original banjo kit in both openback and resonator versions. Plus, our mandolin kits are available in acoustic and solid-body electric versions.

Saga Electric Guitar Kits

Choose your style and make it your own!

Saga[®]

Saga kits chooses the finest examples of both Vintage and Contemporary designs to offer your customers exactly what they want. The modern PS-Style with its distinctive contours and arched-top is a popular choice for the amateur builder and is one of our most requested kits. The classic single-cut models of the 1950s are also best-sellers in our guitar kit line.

SAGA ELECTRIC GUITAR KITS

Saga Banjo and Mandolin Kits

Create a unique sound with a Saga instrument kit!

Traditional acoustic fretted instrument manufacturing throughout history all began with an individual's vision and desire to create their own sound. Saga continue in that same tradition by offering kits of popular Bluegrass instrument allowing any musician, or music lover to build an instrument that expresses their own individual style. Much of the hard work is done, with lots of creative assembly still required for that one of a kind piece!
